

# ATRIX TONER VACUUMS AND ACCESSORIES FROM UNINET

By Mike Josiah and the Technical Staff at UniNet

Atrix toner vacuums sold by UniNet, feature 0.3 micron or true HEPA filters. They also feature ESD (Static charge) safe hoses and accessories. If you have ever used a normal vacuum hose to vacuum toner and been shocked, you will appreciate this type of protection. These vacuums were designed with toner remanufacturers in mind and are all built to last.

UniNet currently sells three different vacuums:

## **THE EXPRESS VAC - (#11492)**

The Express Vac is a small 4 lb. toner vacuum perfect for the traveling technician cleaning customer machines. It's powerful, yet quiet, and features all ESD safe hoses and attachments. The filters hold one quart of toner and come in 0.3 micron and HEPA versions.

## **THE OMEGA SUPREME PLUS - (#5724)**

The Omega Supreme Plus is a more powerful and larger vacuum for technicians cleaning machines as well as some light duty cartridge remanufacturing. The filters available are HEPA and 0.3 micron, and have a 1-gallon capacity. All hoses and accessories are ESD safe, extremely quiet, and come with a 3-year warranty.

**THE HCTV VACUUM (HIGH CAPACITY) - (#6507)**

The High Capacity Toner Vacuum (HCTV) is a very powerful floor model canister vacuum that comes with a five or seven gallon 0.3 micron or HEPA filter. All hoses and accessories are ESD safe and are perfect for cartridge remanufacturing or machine cleaning when done in a production environment.

Whichever you choose, you will be getting a well-made, long lasting piece of equipment that will keep your production area cleaner and keep your customers office clean with no worries of toner being sent out into the air as its vacuumed out of a machine.
